

Assignment 1 : Make your AI study buddy!

1. Choose any topic that you want to understand better: Combustion, Stars and Solar System, Photosynthesis, Quit India Movement, etc.
2. For this activity you will use NotebookLM, which is an AI powered tool for summarizing, organizing, and interacting with notes from various sources. You can use weblinks, links to videos, PDFs, etc. If you don't have any material in your PC or your Google Drive, you can search for the topic on Google (e.g. Photosynthesis CBSE PDF) and download the file or copy the link.
3. To compile the assignment responses, create a folder named "Week 2_Assignment_[Your Name]" in your file manager.
4. Now, open NotebookLM, by typing <https://notebooklm.google> in address bar in any browser and sign in with your Google account (if asked).
5. Click on "Try NotebookLM" and sign in using Gmail ID.
6. Click on "+ Create New" or "+ New notebook" or "Create new notebook" and upload the chapter PDF. You can also use 'Discover Source' to find the source online or on Google Drive.
7. You will see 'Sources', 'Chat' and 'Studio' sections on the website where you can edit and add sources, give instructions to the model and explore audio visual interactive interpretations of the content respectively.
8. After uploading, use NotebookLM to create the following (example prompts included):
 - **Summary:** Type "Create a 1 paragraph summary of the main ideas in this chapter" in the chat and submit. Create a document and copy the response. Save it as 'NotebookLM_Summary'.
 - **Mind Map:** For creating, click on 'Mindmap'. Download the image. Create a document and copy the image and save it as 'NotebookLM_Mindmap'.
 - **Quiz:** Click on Quiz to generate quiz questions. (Number of questions and difficulty can be adjusted using the 'pen button'). Create a document and copy the response. Save it as 'NotebookLM_Quiz'.
 - **Analogy:** In the chat, type "Explain trigonometric ratios (sine, cosine, and tangent) using a simple real-life analogy that a 12-year-old can understand". Create a document and copy the response. Save it as 'NotebookLM_Analogy'.
 - **Study Schedule:** In the chat, type "Create a 30 min study schedule on the topic 'trigonometric identities'". Create a document and copy the response. Save it as 'NotebookLM_Schedule'.
9. Save all the documents in the folder.

Assignment 2 : Channel Your Inner Designer!

1. Choose any event like Annual Science Exhibition, Clean India, Sports Day etc.

2. Open 'Adobe Express' on any browser. Adobe Express is a premium cloud-based content creation tool for every platform.
3. Click on 'Get Adobe Express Free' or 'Go to Adobe Express' and sign in using your Gmail ID to access free trial.
4. Click on 'Generative AI' from the home screen top row and select "Generate with AI" and Click on "Generate Image". You can also explore other options as required.
5. In the text box on the left, type in a clear, descriptive prompt describing the poster you want to create and click "Generate".
 - **Example prompt:** "Create a vibrant Diwali celebration poster with glowing diyas, colorful rangoli, and people celebrating together. Use bright golden and orange tones, add a festive message 'Light Up Happiness This Diwali', and make it look modern, cheerful, and perfect for social media."
 - This generated image can be edited and customized by adjusting parameters in the left pane!
6. Once response is generated, click on 'Text' on the left panel and click on 'Add your Text'. Adjust the text box at the bottom of the page and write "AI imagery created with Adobe Express".
7. Download the poster from the top right bar using download button and name it as "AdobeExpress_Poster_[topic name]_[YourName]".

Submission Instructions

1. Create a folder named "Week 2_Assignment_[Your Name]" in your file manager
2. Compile all the documents / image / video in this folder.
3. Upload the folder in the assignment portal.
