

Week 3 Assignment: The AI Creator & Architect

Welcome to your next hands-on assignment! This week, we're moving from being AI users to becoming AI creators and architects. You'll be directing your own multimedia projects and designing the blueprint for a new AI tool. Let's build the future!

Assignment 1: The Creator's Challenge - Your Multimedia Masterpiece

Objective: To practice using multiple AI tools to create a cohesive multimedia project, combining AI-generated video, audio, and presentation design.

Your Task: Choose a topic you're passionate about and create a short, engaging multimedia report. You can use any AI tools you are comfortable with, such as Gemini for text and ideas, an AI video generator (like Veo / Heygen) for visuals, an AI music generator (like Suno AI) for the score, and an AI presentation maker (like Gamma) for the final deck.

Steps:

1. **Choose Your Topic:** Select a subject that excites you. It could be anything from the science behind ISRO's Chandrayaan missions, the history of the Vijayanagara Empire, or a deep dive into the strategy of your favorite IPL team.
2. **Direct Your Video Clip (upto 20 seconds):** Craft a detailed prompt to generate a short video that captures the essence of your topic. Your prompt should be descriptive and guide the AI on the style, mood, and content.

You can try and use the following ai tools to generate videos :

- https://aistudio.google.com/prompts/new_video?model=veo-2.0-generate-001
- www.heygen.com
 - **Example Prompt (for a topic on the Vijayanagara Empire):** "Create a cinematic, 20-second video clip. Show a hyper-detailed, sweeping aerial shot of the ruins of Hampi at sunrise. The style should be like a historical documentary, with warm, golden light. Focus on the Stone Chariot and the Virupaksha Temple, making them look majestic. The mood should be awe-inspiring and slightly mysterious."
- 3. **Compose Your Background Score (30 seconds):** Write a prompt to generate an original audio track that matches the emotional tone of your video. (use suno.com)
 - **Example Prompt:** "Compose a 30-second instrumental audio track. It should be a fusion of Indian classical and cinematic orchestral music. Start with a solo sitar melody that feels ancient and contemplative. Slowly build in a soft, hopeful string section to create a sense of grandeur and wonder. The overall mood is majestic but peaceful."
- 4. **Design Your Presentation (5 slides):** Create a prompt for an AI presentation maker (eg gamma.ai) to build a concise slide deck that tells the story of your topic. This presentation should be the "container" for your project.

- **Example Prompt:** *"Generate a 5-slide presentation for high school students on 'The Glory of the Vijayanagara Empire'. The design should be elegant and historical.
 - Slide 1: Title - The Vijayanagara Empire: A Forgotten Golden Age. Use a stunning image of Hampi.
 - Slide 2: Introduction - Briefly explain what the empire was and its significance.
 - Slide 3: Art & Architecture - Showcase the empire's key architectural marvels. (You would embed your video here).
 - Slide 4: The Sound of History - A slide to introduce the musical theme. (You would embed your audio here).
 - Slide 5: Legacy - A summary of why the empire is still important today."*

What to Submit:

1. The topic you chose.
2. The exact prompt you used to generate your video.
3. The exact prompt you used to compose your audio score.
4. The exact prompt you used to create your presentation.
5. A link to your final 5-slide presentation.

Submission Guidelines

- Remember, for Assignment 1, the most important part is to include the exact prompts you used!
- Submit your completed document in the submission portal.
